

# Make GenAI investments go further with the Dell AI Factory

## The cost benefit of implementing a Dell AI Factory solution versus AWS and Azure

### Save with a Dell AI Factory on-premises solution

Get more for your investment with a solution from the Dell AI Factory

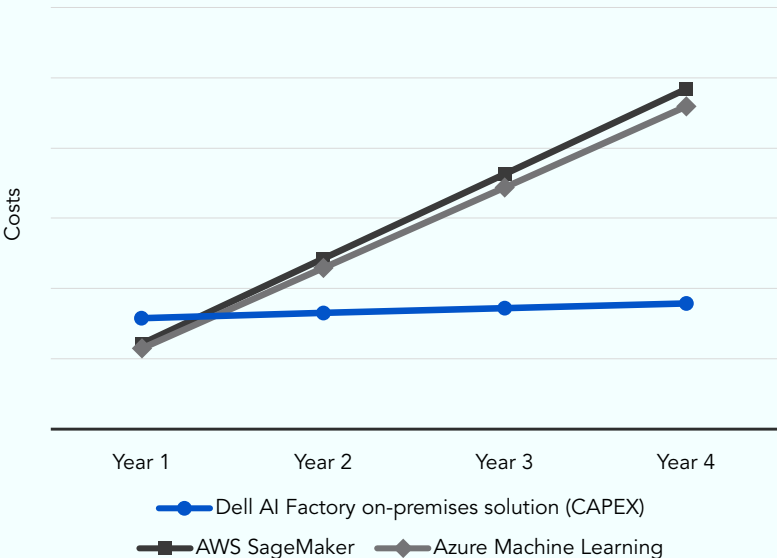

Save up to 63% vs. a competitive AWS solution

Break even at 1.5 years

Save up to 61% vs. a competitive Azure solution

Break even at 1.5 years

4-year TCO costs for a Dell AI Factory on-premises solution vs. AWS and Azure environments | Lower is better

Hosting GenAI in the cloud can lead to compliance issues, security problems, and unexpected additional costs. Choosing a Dell AI Factory solution to run GenAI onsite gives you control and can help you save significant capital—whether you pay for your solution up front (CAPEX) or use Dell APEX Infrastructure.

### Save with Dell APEX Infrastructure

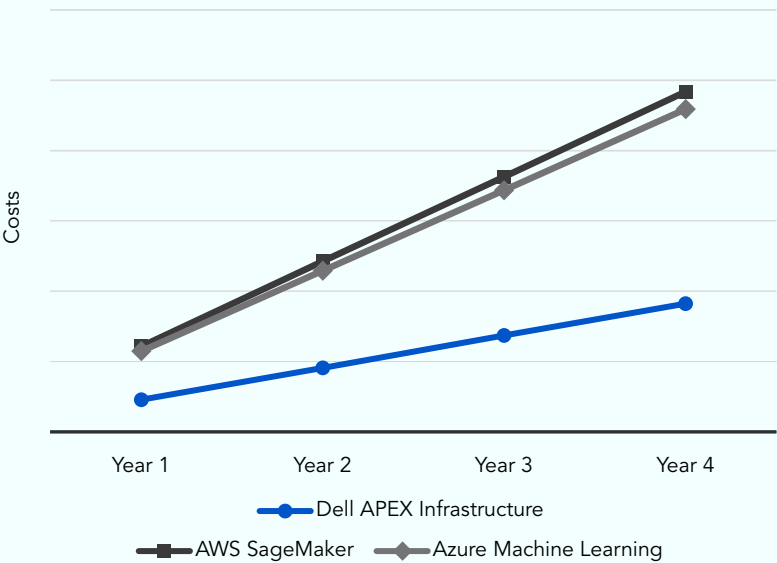

Save up to 62% vs. a competitive AWS solution

Save up to 60% vs. a competitive Azure solution

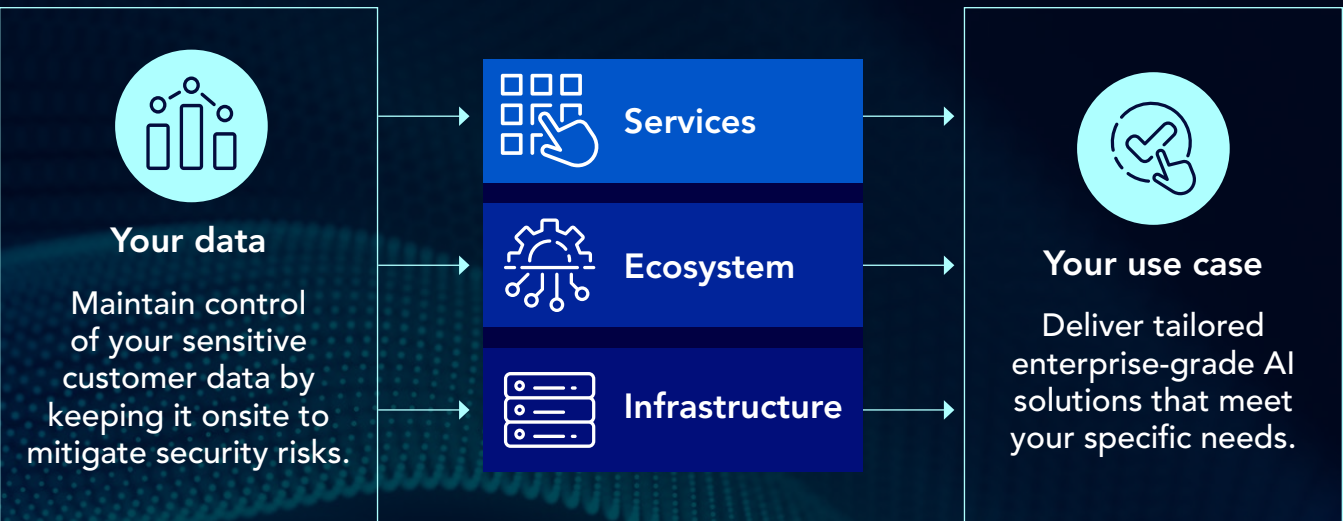

Pay less from day 1

4-year TCO costs for a Dell APEX Infrastructure vs. AWS and Azure environments | Lower is better

### Dell AI Factory

Support a wide variety of use cases with the “world’s broadest end-to-end portfolio of technology and services to support AI innovation,” according to Dell research.<sup>1</sup>

Make your AI project a success when you choose a solution from the Dell AI Factory.
