

Better enable employee productivity on the Dell Latitude 7300 Business Laptop equipped with an Intel Core i7-8665U processor

Compared to the HP EliteBook 735 G6 Notebook PC and the Lenovo ThinkPad x395 Laptop, both powered by AMD Ryzen 7 PRO 3700U processors

Whether your organization has multiple offices and a mobile workforce or is asking employees to work from home in response to current events, powerful business laptops can help limit disruption and keep everyone productive. So, how does the 13-inch Dell Latitude™ 7300 Business Laptop powered by an Intel® Core™ i7 processor handle day-to-day tasks compared to two business laptops powered by AMD Ryzen™ processors?

To find out, we measured the collaboration and media creation capabilities of the Dell Latitude 7300 Business Laptop equipped with an Intel Core i7-8665U processor. Next, we compared these hands-on test results to those from the HP EliteBook 735 G6 Notebook PC and the Lenovo® ThinkPad® x395 Laptop—both powered by AMD Ryzen 7 PRO 3700U processors. To gauge productivity and determine battery life, we also compared the business laptops' scores in three benchmarks that reflect real business worker usage and found that the Dell Latitude 7300 Business Laptop equipped with an Intel Core i7-8665U processor delivered higher scores and longer battery life than either competitor.

The wins cited on this page represent only some of our hands-on testing results. Continue reading to learn about the business laptop configurations we tested and the real-world results that matter to you.

Productivity

- Realize up to 95% better performance on day-to-day browser tasks based on WebXPRT 3 overall scores
- Work unplugged between four and five hours longer based on MobileMark 2018 battery life results

Collaboration

- Pause and resume your work in up to 67% less time
- Catch up on email in up to 43% less time
- Crunch spreadsheet numbers in up to 70% less time
- Get a presentation ready to send as a PDF in up to 52% less time

Media creation

- Reduce image file sizes in up to 39% less time
- Stitch together photos in up to 40% less time

Testing overview

Your organization deserves business laptops that work as hard as you do. Manufacturer specs give you processor, memory, and storage info—but how do you know if an impressive resume translates to added value in the real world? That's where we come in. Our hands-on testing and benchmark results reflect real-world environments using real applications, data sets, and business user workloads. The laptops in all three solutions included business-targeted processors, 8 GB of RAM, and 256GB SSDs:

- **Dell/Intel vPro solution:** The Dell Latitude 7300 Business Laptop, powered by an Intel Core i7-8665U processor.
- **HP/AMD PRO solution:** The HP EliteBook 735 G6 Notebook PC, powered by an AMD Ryzen 7 PRO 3700U processor.
- **Lenovo/AMD PRO solution:** The Lenovo ThinkPad X395 Laptop, powered by an AMD Ryzen 7 PRO 3700U processor.

For the productivity and battery life tests, we ran the SYSmark® 2018, MobileMark® 2018, and WebXPRT 3 benchmarks—all use actual applications in real-world workloads that reflect business worker usage patterns—for overall comparison.^{1,2,3} Then, we hand-timed how long it took each laptop to perform common office, collaboration, and content creation tasks, executing each task three times and using the median of the three runs in our comparisons. For a deeper dive into the individual results as well as our testing parameters and procedures, see the [science behind this report](#).

Dell Latitude 7300 Business Laptop

This 13-inch notebook comes with SafeScreen, Dell's digital privacy filter designed to protect screens from prying eyes, and features optional Intel vPro platform technology, which enables authorized IT admins to remotely manage, diagnose, and update PCs as well as manage conference room capabilities.⁴

Productivity

The Dell Latitude 7300 Business Laptop, equipped with an Intel Core i7 vPro processor, came out on top in all three benchmark comparisons. You can find individual category and scenario scores in the [science behind the report](#).

Conclusion

Through our hands-on testing, we found that the Dell Latitude 7300 Business Laptop, powered by an Intel Core i7-8665U processor, lasted longer unplugged and delivered faster system response times on a variety of tasks than either the HP EliteBook 735 G6 Notebook PC or the Lenovo ThinkPad X395 Laptop, both powered by AMD Ryzen 7 PRO 3700U processors. The Dell Latitude 7300 also scored better overall in the SYSmark 2018, MobileMark 2018, and WebXPRT 3 benchmark comparisons. Your employees deserve business laptops that work as hard as they do, and these wins show the Dell Latitude 7300 could help them accomplish great work every day.
