Free up rack space by replacing old servers and storage

A 2U Dell™ PowerEdge™ FX2s and all-flash VMware® VSAN® solution powered by Intel® Xeon® processors and Intel SSDs can reduce hardware in your datacenter

Do 16 times the work in only 2U of rack space

16 legacy solutions

New PowerEdge + VSAN solution

Dell PowerEdge FX2s
4x PowerEdge FC430
2x PowerEdge FD332

Gain insight on hardware

DPACK is performance analysis software that can help you characterize your existing performance and resource utilization. Run it in your datacenter to see current limitations, which can guide your upgrade process.
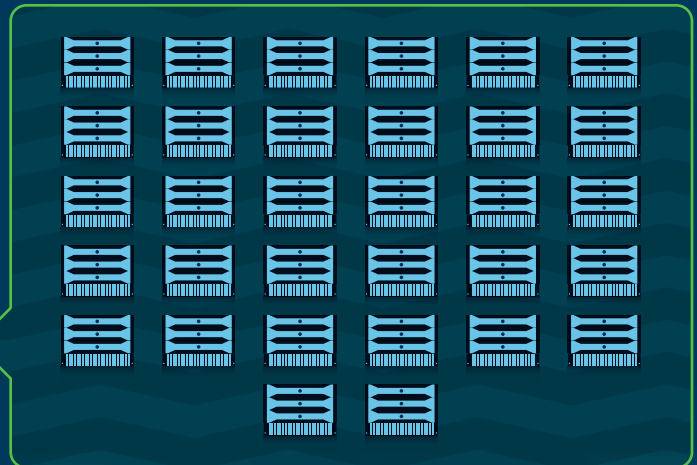

Beef up the PowerEdge FX2s with VSAN license versatility

32 legacy solutions

The VMware VSAN 6.2 license gives you the flexibility to use a traditional external SAN in addition to VSAN.

Adding an all-flash Dell Storage SC4020 doubled our four-node performance.
