

The HP EliteBook 8 G1a 14 inch Notebook Next Gen AI PC: Innovation at your fingertips

Compared to Intel® Core™ Ultra 7 268V processor-based Dell™ and Lenovo® PCs, the AMD Ryzen™ AI 7 PRO 350 processor-powered HP AI PC can speed up productivity and AI tasks—and more

Up to 57.0% better on-device AI performance

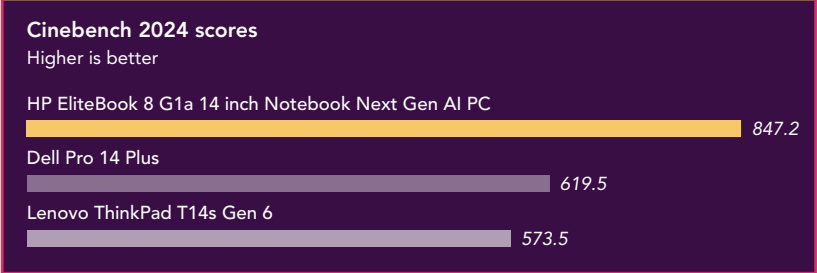

Accelerate AI apps

Geekbench AI measures on-device AI performance at different precision levels using real-world machine learning (ML) apps.¹ The precision levels reflect different requirements for AI models.

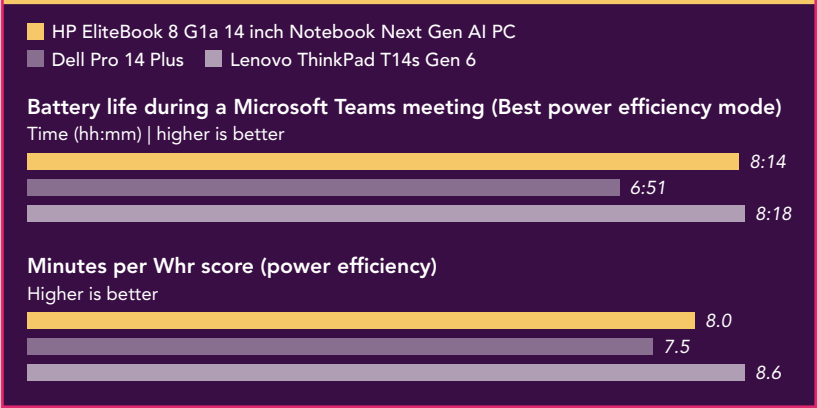

Speed up resource-intensive work

The Cinebench 2024 benchmark evaluates processor performance by rendering a 3D scene with CPU-intensive Redshift for Cinema 4D software.²

Up to 47.8% higher CPU multi-core performance

Up to 1 hr and 23 min longer battery life

Collaborate on the go

For our real-world battery life assessment, we set up a Microsoft Teams meeting for nine participants and measured how long the laptops’ batteries lasted. In this test, the HP EliteBook 8 G1a 14 inch Notebook Next Gen AI PC delivered more than a full workday’s worth of battery life and a strong power efficiency ratio.
